Berlin, Germany

PROFESSIONAL SUMMARY

Networking professional with CCNP Enterprise, studying a part-time BSc in Computer Engineering. After 18 months running customer satisfaction for a 1,300-guest hostel, I completed CCNA and CCNP Enterprise training to move into IT. I document everything I build, speak Spanish, English and German, and I am looking for an entry-level role in Berlin in IT support, system administration or network administration.

WORK EXPERIENCE

Mediateam IT Education Center 09/2025 – 04/2026

CCNA + CCNP Enterprise Trainee

Berlin

- Hands-on training in Cisco network design, configuration and troubleshooting. About 70% of the course was lab work: VLANs, OSPF, EIGRP, NAT/PAT, DHCP, ACLs, VLSM and multi-site WAN designs.
- Built a redundant enterprise network: two ISP links with BGP, HSRP on the edge and core, port-channels and spanning tree to the access layer, VLANs, DHCP, NAT/PAT and wireless. Tested failover and fixed missing default routes on the core switches.
- Built an enterprise branch network: VLSM, router-on-a-stick, central DHCP with relay agents, multi-area OSPF and NAT overload. Fixed missing VLANs, native VLAN mismatches and address gaps that blocked OSPF.
- Kept configs and change notes in Git and wrote up every lab on my blog.

a&o Hostels 02/2024 – 07/2025

Customer Service / Guest Relations Manager

Berlin

- Ran customer satisfaction for a 1,300-guest hostel: overbookings, payment problems, noise complaints and maintenance emergencies.
- Handled 60–80 escalated cases a week by email and chat in German, English and Spanish, and answered most of them within 4 hours.
- Wrote the response templates and the escalation process the team still uses. Repeat guests went up 11% year over year.

PROJECTS

Home Lab Rack in progress, 2026

A small 20U rack for practising real infrastructure work: four Cisco Catalyst switches in a spine-leaf design with fiber and copper links, a labelled patch panel, a UPS with safe shutdown, out-of-band access and written runbooks for common failures.

Redundant Network Design Lab 2025

Enterprise network with redundancy at every layer, documented from design to failover tests.

BGP, HSRP, port-channels, STP, VLANs, NAT/PAT

Enterprise Branch Connectivity Lab 2025

A new branch office joined to a company network with a main site and one remote office.

VLSM, 802.1Q, DHCP relay, multi-area OSPF, NAT

Technical blog gonzalobrandan.com

Every lab I build, written up: the problem, the design, the configuration, the tests and what broke along the way.

EDUCATION

BSc Computer Engineering (part-time, online) [Universitat Oberta de Catalunya, Barcelona](https://www.ub.edu/) 09/2024 – 09/2029 (expected)

Courses so far: math for engineering, programming fundamentals, computer architecture, networking basics.

CERTIFICATIONS

CCNP Enterprise	Cisco
CCNA	Cisco
TELC German B2	telc

SKILLS

Networking: VLANs, OSPF, EIGRP, basic BGP, HSRP, STP, port-channels, NAT/PAT, DHCP, ACLs, VLSM, IPsec and DMVPN, Cisco IOS
Tools: Cisco Packet Tracer, GNS3/EVE-NG (basic), Wireshark (basic), Git, Jira Service Management (basic)
Systems: Linux (Ubuntu, Fedora; intermediate), RHEL and Ansible (learning), Windows, Intune and Entra ID (basic)
Languages: Spanish (native), English (C1+), German (B2)
